

VEKAdeck[®]
ADVANCED CELLULAR PVC DECKING

Premium Decking

Transform Your Outdoor Space

VEKAdeck® is the perfect way to add value and beauty to any home. A cellular processed PVC deck board, VEKAdeck is ideal for homeowners, architects and builders.

VEKAdeck's long life, durability and low maintenance, along with a high return on investment, make it a superior board for residential and commercial deck applications.

An environmentally friendly alternative to lumber and composite deck boards, VEKAdeck is approved for ground contact without absorbing moisture or rotting.

VEKAdeck & Fascia Board, A Perfect Combination of Durability

Features:

Made with a proven formula that has been around for almost 25 years, VEKAdeck and VEKAdeck fascia are designed to blend seamlessly together. Install VEKAdeck on curves and semi-circles, along with fascia trim for a unique custom design.

- VEKAdeck available in a 5.5" width and 1" thickness
- Fascia available in a true 12" width and 7/16" thickness, 8" riser fascia board coming soon!
- Deep embossed wood grain pattern, one of the thickest capstocks in the industry
- Installs traditionally, or with recommended fasteners or stainless steel screw systems
- Low maintenance, no paint or stain upkeep; cleans easily, saving you time and money
- Durability and performance assured with limited lifetime warranty: visit vekaolp.com for details

Engineered for Performance

Our vinyl compound is specifically formulated for maximum performance. Pure materials and micro-ingredients are concentrated in an outer layer. Stabilizers and impact modifiers are blended into the inner core for durability and strength. Our cellular process creates a microscopic honeycomb structure throughout the substrate, keeping weight down while adding to the workability of the finished board.

VEKAdeck is designed to have a slight crown and radius edges, ensuring proper runoff. During the in-line process, the lineal is embossed with a deep wood grain. The result is a surface that is slip resistant, wet or dry.

VEKAdeck has been tested by Intertek to the ICC-Evaluation Service AC174 criteria for structural properties, durability and surface burning characteristics. When installed in accordance with local building codes, VEKAdeck has been shown to be a superior decking surface.

VEKAdeck Groove

After months of design variations and testing, VEKAdeck Groove deck board is compatible with most hidden deck fasteners designed for slotted PVC deck boards. Groove offers the same proven quality and consistency as our standard cellular PVC deck board, backed by the same no-nonsense warranty that's been around for over two decades.

- Carries the same inherent design features and benefits as traditional VEKAdeck
- Top surface is not penetrated with screws, plugs or other systems that could compromise dimensional integrity commonly seen in typical composite decking containing organic materials
- Faster installation than conventional deck boards
- Lightweight cellular extrusion process yields low specific gravity, making VEKAdeck lighter than wood and composite materials
- VEKAdeck Groove is available in Khaki, Pewter and our four Signature colors: Espresso, Cayenne, Hazelnut and Storm

Easy to Care For

PVC is non-absorbent, stain resistant and does not require painting, staining, UV treatment or water sealing. A periodic cleaning with ordinary non-abrasive household cleaners and a stiff bristle brush will keep your VEKadeck installation the perfect combination of durability and beauty. Seasonal pressure washing is all that's needed to keep your VEKadeck looking like new.

100% Cellular PVC Core

VEKadeck is not a composite and contains no organic material.

Installs Easily & Quickly

VEKadeck is lightweight and easy to handle. VEKadeck and matching fascia can be cut, sawed, screwed, and requires no pre-drilling. Install traditionally like wood, with deck screws.

Recommended stainless steel screws self-counter-sink and the board will not mushroom or split. Install VEKadeck using most hidden fastening systems available today for a beautiful flush finish.

VEKadeck: Unrivaled Durability, Ideal for Marine Environments

Resistant to ultraviolet, chlorine, salt spray and humidity, long-lasting VEKadeck is the ideal choice for your swimming pool deck, boat dock, pier or other marine installation. Our vinyl compound is impervious to moisture and the deep wood grain pattern creates a slip-resistant surface, wet or dry.

FEATURES & BENEFITS

Environmentally Responsible

Lightweight

Insect Resistant

Easy to Work

Low Maintenance

Easy to Clean

Slip Resistant

Easily Fastened

Fire Resistant

▶ Color Retention

VEKAdeck is fade resistant under normal weathering conditions.

▶ Dimensionally Stable

Low expansion and contraction rate allows for end to end butt joints.

▶ Fire Resistant

PVC has a high self ignition temperature (over 600°F), a slow burn rate and will self extinguish if the flame is removed

▶ Impact Resistant

Meets or exceeds the ASTM Standards for breaks and punctures.

▶ Splinter Proof

PVC compound will not crack, split, splinter, rot, flake or peel.

▶ Water Resistant

Moisture resistant ideal for high humidity and marine areas.

Recycled & Recyclable VEKAdeck

VEKA captures its in-house startup material and run-offs, which are pulverized into PVC powder. This powder is introduced back into VEKAdeck and VEKA DualEdge profiles for fence and rail shapes.

Performance additives in the outer co-extruded surface of VEKAdeck aid in impact modification, heat reflectance and color retention.
